Irrigation

ABOUT CARLO GAVAZZI

Carlo Gavazzi Automation is an international group active in designing, manufacturing and marketing electronic equipment targeted at the global markets of industrial and building automation.

Our history is full of firsts and our products are installed in a huge number of applications all over the world. With more than 80 years of successful operation, our experience is unparalleled.

We have our headquarters in Europe and numerous offices around the world.

Our R&D competence centres and production sites are located in Denmark, Italy, Lithuania, Malta and the People’s Republic of China.

We operate worldwide through 22 of our own sales companies and also selected representatives in more than 65 countries, from the United States in the West to the Pacific Rim in the East.

Our core competence in automation spans three product lines: Sensors, Switches and Controls.

Our wide array of products includes sensors, monitoring relays, timers, energy management system, solid state relays, safety devices and fieldbus systems.

We focus our expertise on offering state-of-the-art product solutions in selected market segments.

Our customers include original equipment manufacturers of packaging machines, plastic-injection moulding machines, food and beverage production machines, conveying and material handling equipment, door and entrance control systems, lifts and escalators, as well as heating, ventilation and air-conditioning devices.
DESIGNED TO MEET MARKET REQUIREMENTS

Agricultural mechanization has brought major changes to agriculture and eased the burden on farm workers. Advances in tractor technology have made tractors more versatile and suitable for a wider range of farming tasks.

Machinery for ploughing and cultivation have contributed to boosting production. Special machinery is used to plant seeds and apply fertilizer through mulch at the correct depth. In irrigation, technologies such as micro sprinklers or drip irrigation that save water and consume less power are the environmentally friendly solutions for now and the future.

The global agricultural machinery industry provides more support to smallholders and other farmers with equipment designs and models that suit their needs and those of service providers.

Carlo Gavazzi offers, among other things, a wide range of sensors to measure speed and rotational direction of wheels in farm tractors, harvesting machines etc.

Carlo Gavazzi’s capacitive sensors are widely used for level measurements of seed, fodder and liquids in silos and in animal feeding machinery. Ultrasonic sensors are used mainly for level measurements of liquids (e.g. milking machinery).

Reliable irrigation systems are highly important for agricultural production. The well proven Dupline® fieldbus with its up-to-the-minute technology, has become known as an extremely user-friendly and flexible fieldbus able to transmit signals over long distances - features that make Dupline® ideal as a fieldbus for irrigation systems.

Finally – thanks to Carlo Gavazzi’s wide product range – most agricultural application challenges can be met by one supplier.
Agricultural machinery needs reliable and durable parts and components able to work long hours in difficult outdoor conditions, exposed to every kind of stress. Carlo Gavazzi offers a comprehensive range of components for most applications in agricultural and earth-moving vehicles, from passive magnetic pick up sensors (PA2PK) to inductive proximity sensors.

The pick up sensors detect and measure the speed of phonic or toothed wheels and generally of any rotating device built in a ferromagnetic material and provided with slots and cogs, for example in engines and in tractors.

Inductive sensors are used for non-contact measurements - for example to count revolutions of the axle in machinery or to monitor the bucket position in a backhoe loader. Safety and positional mechanical switches in different versions and configurations are also available.

Ultrasonic sensors (UA series) are also used to monitor sprayer heights in self-propelled row-crop sprayers. A particular application of ultrasonic sensors with analog output is the control of the driving direction of the wagons or a motorized chassis - equipped with one or more fixed or mobile platforms - for example - for harvesting fruit.

Carlo Gavazzi offers very efficient means for liquid and solid level measurement, both in large silos and in small storage containers. Our 4th generation TRIPLESHIELD™ capacitive sensors are designed to detect objects with a dielectric constant (DC) of as low as 1.5. The CA18 and CA30 CAN/CAF sensors are excellent for accurate measurement of dry grain regardless of degree of humidity. The sensor provides a stable and precise signal of yield per unit area. Knowing these areas makes it easy to adjust the amount of fertilizers and herbicides in exactly the right way. As a result, cost can be reduced and the environmental impact minimized. The capacitive sensors EC30 (AC version) have a long sensing distance that allows easy detection of the grain. The VC11/12 sensors are available in multivoltage power supply with relay output and used in many applications for the agriculture business. The conductive level program by Carlo Gavazzi comprises a complete range of intelligent conductive level controllers for liquids such as in slurry tanks (CL-series), CLH electrode probes (3 or 5 electrodes). Various adjustment possibilities enable the controller to perform filling operations, emptying operations or a combination of the two.

---

CARLO GAVAZZI Automation Components. Specifications are subject to change without notice. Illustrations are for example only.
Feeding distribution systems are critical to the quality and safety of farms with pig, poultry and dairy sectors. It is important to feed all the chickens at the same time and manual handling is eliminated.

The distribution is controlled by sensors (capacitive, inductive, photoelectric), normally combined with solid state relays and soft starters. Carlo Gavazzi capacitive level sensors are excellent for use in the agricultural sector (detection of feed, fluids etc.). The VC11/12 sensors are able to directly drive a contactor or a small motor.

The PD30 Stainless steel sensors work perfectly even in the harshest environments. The high-quality stainless steel housing guarantees maximum mechanical resistance, and prescribed cleaning schedules are smoothly met without costly machine downtime. Ultrasonic sensors or capacitive sensors control the levels in the silos and monitor emptying to ensure the efficiency of the process. Carlo Gavazzi soft starters (RSGD) soft start and soft stop pumps, screw feeders, ventilators as well as chillers (RSBT).

Temperature control in animal farms is optimised with the RGC1P proportional controller which, through an analog input, regulates the power of heating lamps. Furthermore, RGC3P (in special version) is used for optimal speed control of ventilators in egg incubators.

Traditional irrigation systems are characterized by complex and expensive wiring. The Carlo Gavazzi Dupline® irrigation bus reduces installation costs and increases flexibility in agricultural irrigation systems, where the valves are usually distributed over a large area. Any type of irrigation controller, whether it is a PLC, PC or dedicated controller, can use Dupline® as a remote I/O system. The wiring topology is completely free, with no limitation to the number and length of branches. The Dupline® Fieldbus is the ideal system to control levels, monitor pumps and activate valves over a large area and from a distance.

In centrifugal pump applications the softstarter RSWT series represent a plug and play solution to easily replace star-delta starters and contactors. This soft starter only requires 1 setting for the ramp-up and ramp down time for the pump. All the rest is taken care of by the RSWT self-learning algorithm that is active during every start and makes sure that the pump is started within the set time, whilst optimising the pump starts and stops.

The Carlo Gavazzi product range includes a variety of automation components suitable for use in irrigation, landscaping and greenhouses: monitoring relays, inductive, capacitive and ultrasonic sensors, digital panel meters and energy meters.

**MAIN FEATURES**

- 4th generation TRIPLESHIELD™ technology
- Dust and humidity compensation
- Dust and temperature alarm outputs
- Increased temperature stability
- Sensing face can withstand temperatures up to 120°C

**CB32**

- TRIPLESHIELD™ sensor protection
- Adjustable sensing distance: 4 - 20 mm
- Dimensions: Ø32
- Capacitive level sensors for solid, fluid or granulated substances
- Protection transient and reverse polarity
- Approvals/Marks: CE

**MAIN FEATURES**

- Approved acc. to ATEX directive operation in potential explosive dusty
- Relay output
- With or without adjustable time delay

**CA18CL**

- TRIPLESHIELD™ sensor protection
- Sensing distance: 0.5 - 12 mm (M18)
- Plastic housing, AC versions
- Automatic detection of NPN or PNP load
- Selectable “make or break” switching by means of Teach function
- Approvals/Marks: CE - UL - CSA

**MAIN FEATURES**

- Teach-in of sensing distance via push-button or COM-input
- Humidity compensation
- Protection: short circuit, transients and reverse polarity

**EC30**

- TRIPLESHIELD™ sensor protection
- Sensing distance up to 25 mm
- Dimensions: M30
- Plastic housing, AC versions
- Approvals/Marks: CE - UL - CSA

**MAIN FEATURES**

- Detection of e.g., corn or feed
- Sensing face can withstand temperatures up to 120°C
- Protection: short circuit, transient and reverse polarity
## Our product range

### Pick up sensors

**PA2PK**
- **Dimensions:** diameter M20 x 1.5 length 60, 70, 107 mm
- Pulse output function
- Cylindrical nylon with 30% glass fibre
- Protection degree IP65
- Approvals/Marks: CE

### Ultrasonic sensors

**UA18 / UA30**
- **Dimensions:** M18, M30
- Ultrasonic sensors with integrated amplifier providing a digital and/or analog output and integrated amplifier
- Up to 6 m sensing distance
- Switching output with two setpoints
- Housing material: plastic or AISI316L Stainless Steel
- Approvals/Marks: CE - cULus - CSA

### Conductive level controllers / probes

**CLD / CLP / CLH**
- 17.5 mm slim housing, 22.5 mm & 35 mm housing available
- Multiple filling and emptying functions
- 24-240 VAC/DC (CLD2EB1BU24)/24 VDC, 115 VAC, 230 VAC
- Flexible modular probes up to 5 electrodes (CLH5)
- Extendible probes for longer length

### Photoelectric sensors

**PD30ET**
- **World standard housing style 11 x 31.5 x 21 mm**
- **Supply voltage:** DC 4-wire
- **Output:** NPN/PNP NO+NC
- **Sensor types:** D, B, R, P and T
- **Connectivity:** Cable or M8 connectors
- **Approvals/Marks:** CE - cULus (UL508, CSA C22.2) - ECOLAB

### MAIN FEATURES
- Stainless Steel housing AISI 316L
- Resistant to high-pressure washdown, aggressive cleaning agents.
- IP67, IP68, IP69K, NEMA type 1, 2, 4, 5x, 5, 6P
- Protection: reverse polarity, short circuit and transients

**PA18**
- **Standard M18 cylindrical housing**
- **Power supply:** 10 to 30 VDC
- **Separate models available for NPN or PNP outputs**
- **Sensing types:** Diffuse reflective, BGS, Pol. Retro-reflective, Through beam
- **Sensitivity adjustment by potentiometer**
- **Approvals/Marks:** CE - cULus

### MAIN FEATURES
- **IP69K / ECOLAB approved / CE marking / cULus approved acc. to UL508**
- **Diagnostic LED indication (Green and Yellow LED)**
- **Short-circuit, reverse polarity and overload protection**

**PH18**
- **Square sensor with M18 front**
- **Power supply:** 10 to 30 VDC
- **Separate models available for NPN or PNP outputs**
- **Sensing types:** Diffuse reflective, BGS, Pol. Retro-reflective, Through beam
- **Sensitivity adjusted by potentiometer**
- **Approvals/Marks:** CE - cULus

### MAIN FEATURES
- **IP69K / ECOLAB approved / CE-marking / cULus approved acc. to UL508**
- **Diagnostic LED indication (Green and yellow LED)**
- **Short circuit, reverse polarity and overload protected**

## MAIN FEATURES

### 1-phase solid state switches
- High precision and reliability thanks to the microprocessor technology
- Selectable switching modes
- Integrated overvoltage protection
- Monitoring for SSR and load circuit malfunctions (RGC2P, RGC3P)

### 1 and 3-phase proportional controllers
- Certified compatibility with most of the detergents and disinfectants available on the market
- Short-circuit and overload LED indication
- Extended temperature range: -40°C to +80°C (+40°C to +85°C for ICS30)

### 3-phase scroll compressor soft starters
- Several operating distances thanks to wide range of magnetic units (CL series)
- Easy and fast mounting

**MAIN FEATURES**
- Easy to use and setup
- Self-learning algorithm to adapt to different loads
- Auxiliary relays for top of ramp and alarms

**DIA53**
- Dimensions: 81 x 17.5 x 67.2 mm DIN-rail housing with 12 mm hole for current measurement
- Current monitoring relay with built-in current transformer
- 20, 50 or 100 A full scale
- Self powered
- Approvals/Marks: UL - CSA - CCC

**MAIN FEATURES**
- 2-wire connection
- Knob adjustable setpoint
- Integrated solid state NPN PNP output

**DPB52**
- Dimensions: 81 x 17.5 x 67.2 mm DIN-rail housing
- Phase sequence and phase loss, regenerated V detection
- 3 phase AC (own power supply)
- Power supply from 125 to 624 VAC (rated 208 to 480 VAC)
- Approvals/Marks: UL - CSA - CCC

**MAIN FEATURES**
- Overvoltage/undervoltage setting with alarm ON delay
- 1 DIN module width. Suitable NORMA panels
- Switch mode power supply

**DIB02 / PIB02**
- Dimensions: 22.5 mm for DIN-rail (DIB) or 35.5 mm for plug in (PIB)
- Overcurrent or undercurrent detection
- DC current measurement by means of external Shunt
- Power supply 115/230 VAC, 24/48 VDC, 24 VDC, 48 VDC
- Adjustable time delay

**MAIN FEATURES**
- Motors protection from overload
- DC or AC current measurement
- 3-phase overcurrent measurement with MP3 CT

### MAIN FEATURES

- **GH6440 4412**  
  - Built-in Gas-arrestor for lightning protection  
  - Suitable for measuring generated and consumed energy  
  - On request, MID annex D certification available  
  - Added port integrated in the meter without external gateways  

- **GH3440 4412**  
  - Direct measurement in a very compact housing to save space  
  - Built-in microcontroller for correct coil-pulsing and charge monitoring  
  - Valve closes in case of bus fault  

- **GH3485 0000**  
  - Built-in Gas-arrestor for lightning protection  
  - Up to 7 km transmission distance  

- **GHTU8**  
  - Monitoring of Hi-line channel status with LCD display  
  - Designed as part of the Dupline® irrigation concept  

- **SPD**  
  - Overload protection  
  - Parallel versions available  
  - High efficiency

<td><strong>SPPC: Enclosed type 480 W...800 W</strong></td>
</tr>
<tr>
<td>- Universal input from 90 – 264 VAC</td>
<td>- Built-in active PFC (Power Factor Protection) from 100 W</td>
<td>- Universal AC input/ Full range</td>
</tr>
<tr>
<td>- Integrated short-circuit and overload protection with built-in input filters</td>
<td>- Output protections: SCP/OLP/OPP</td>
<td>- Built-in active PFC function, PF&gt;0.96</td>
</tr>
<tr>
<td>- High efficiencies of up to 89%</td>
<td>- Approvals/Marks: CE - cULus - TUV</td>
<td>- Output protection: OVP/OLP/SCP/OPP/OTP</td>
</tr>
<tr>
<td>- Approvals/Marks: CE - cULus - TUV</td>
<td>- Built in AC inrush current limiting circuit (&lt;20 A)</td>
<td>- Built in Remote Sense Function</td>
</tr>
</tbody>
</table>

**MAIN FEATURES**
- Compact design for installation within distribution box with ratings up to 100 W
- Intuitive visual and electrical indications
- Selected models comes with UL 1310 Class 2 classification and ISA 12.12.1 CLASS I DIV2

<tr>
<td>- Outputs for Device OK, Battery OK and battery Low.</td>
<td>- Power boost up to 2 times rated output, permanent</td>
<td>- Minimum actuation force / torque</td>
</tr>
<tr>
<td>- DIN rail battery accessory available up to 7.2 A/h</td>
<td>- Built in battery diagnosis</td>
<td>- Approvals/Marks: CE - UL - CSA</td>
</tr>
</tbody>
</table>
| - Approvals/Marks: CE - UL | - Approvals/Marks: CE - UL | - MAIN FEATURES
- Power supply independent from charger
- Remote indication for battery operation and battery low
- “Start from battery” and “Empty battery charging” features

**MAIN FEATURES**
- To be used in addition to 12 or 24 V power supply
- Front 30 A replaceable fuse
- Plug and play: no settings needed

**MAIN FEATURES**
- Mechanical life > 15,000,000 cycles
- Precise operating point
