ABOUT CARLO GAVAZZI

Carlo Gavazzi Automation is a multinational electronics group active in designing, manufacturing and marketing of electronic equipment targeted at the global markets of industrial and building automation.

Our history is full of firsts and our products are installed in a huge number of applications all over the world. With more than 80 years of successful operation, our experience is unparalleled.

We have our headquarters in Europe and numerous offices around the world.

Our R&D competence centres and production sites are located in Denmark, Italy, Lithuania, Malta and the People’s Republic of China.

We operate worldwide through 22 of our own sales companies and also selected representatives in more than 65 countries, from the United States in the West to the Pacific Rim in the East.

Our core competence in automation spans three product lines: Sensors, Switches and Controls.

Our wide array of products includes sensors, monitoring relays, timers, energy management system, solid state relays, safety devices and fieldbus systems.

We focus our expertise on offering state-of-the-art product solutions in selected market segments.

Our customers include original equipment manufacturers of packaging machines, plastic-injection moulding machines, food and beverage production machines, conveying and material handling equipment, door and entrance control systems, lifts and escalators, as well as heating, ventilation and air conditioning devices.

Coffee and vending machines

Heating and cooking equipment

Ice makers and cooling systems
DESIGNED TO MEET MARKET REQUIREMENTS

With over 40 years of expertise in manufacturing components for food and beverage equipment, Carlo Gavazzi can provide a wide range of advanced and reliable products for commercial heating and cooking equipment, ice making technology and cleaning processes.

Carlo Gavazzi is a market leader in solid state relay technology, offering innovative solutions in very compact dimensions for the control of heater loads. The range of products includes solid state relays for PCB mounting, chassis mounting as well as solutions ready for use with a built-in heatsink.

The number of switching cycles in food and beverage equipment is quite substantial and a reliable switching solution that guarantees a long, maintenance-free lifetime can be provided only with solid state switching.

Carlo Gavazzi sensors are widely used to detect door closure or to check water level in coffee machines.

Food and beverage processes demand equipment capable of working in harsh environments and conditions.

The Carlo Gavazzi range of sensors includes new photoelectric and capacitive types (Ecolab and IP69K approved) capable of withstanding high pressure and steam cleaning.

Monitoring relays, timers, switching power supplies and energy meters complete the range of Carlo Gavazzi products to ensure safe operation and monitoring of equipment, while increasing longevity.
Coffee and vending machines

Coffee and beverage machines, for both domestic and commercial use, must be reliably monitored in order to avoid any damage to the electromechanical elements such as the pump or the electrical resistance. Carlo Gavazzi products provide efficient control and ensure the reliability of equipment.

Level sensors are the best solution to check the water level. The sensor may be installed directly in the bottom of the tank. Usually, plastic propylene sensors (ILSP, ILM series) are used for this purpose. A second solution consists of a float in the tank controlled by means of magnetic sensors.

The switching of heaters can be carried out reliably with the RF1, RAM1A..G or RA2A series which are fully solid state solutions and hence are not so susceptible to problems concerning contacts and arcing as is the case with electromechanical solutions. The RAM1 and RA2A series are also suitable for motor switching.

In the coffee and vending machine market, the quality of dispensed drinks (hot and cold), reliability, easy cleaning and maintenance are the keys for success.

In coffee machines, the PD30 sensors with background suppression detect the cups to prevent coffee spillage. The CD50 sensors detect the level of coffee beans while the CD34, designed for water-based liquids, can ignore any residual film, moisture or foam.
Manufacturers of cooking equipment such as ovens, griddles, steamers and toasters need to ensure food quality and safety, improving production processes and ensuring long operating lifetime.

Global legislation enforces restrictions and bans on the use of mercury. Carlo Gavazzi solid state relays and contactors are RoHS compliant and are mercury free.

They can operate in humid conditions without being affected by vapors that may be present in the surrounding environment.

The Carlo Gavazzi solid state solutions integrate protection against uncontrolled transients and over voltages to guarantee reliable operation. Additionally, the materials used for the RF1, RAM1A..G, RK and RG conform to the glow wire requirements of IEC/EN 60335-1 (Safety of Household and Similar Electrical Appliances).

The RF1, RK and RG series offer the possibility of panel space optimization. The RF1 occupies only 30% of the space required by other panel mount solid state relays, RG solutions are available in a width as small as 17.5 mm and the RK houses 2 poles in one platform providing up to 50% space savings.

The RGCxP series enables analog inputs to be connected directly to the relay when it is necessary to control the output power in proportion to the level of control input.

Machinery protection from voltage surges, overcurrent or phase loss is ensured by Carlo Gavazzi compact monitoring relays, thus prolonging their lifetime.
Thanks to the progress in energy efficiency, reduced size and low refrigerant charge there are many applications of ice making technology, with millions of ice makers around the world. You can find ice makers in hotels, bars and restaurants as well as in hospitals, laboratories, supermarkets and in the food industry. The wide range of inductive, capacitive, photoelectric and ultrasonic sensors by Carlo Gavazzi includes some types suitable to be installed in ice makers. An inductive sensor - specifically designed for this application - detects low speed of the gear motor, sending a signal to the PC board which stops the ice machine operation. Carlo Gavazzi photoelectric sensors can be used for ice level control. The sensor will send signal to the P.C. board to stop the machine when a beam of light sent by the optical device is shielded by ice. The ice machine will stop making ice before the bin or dispenser is full. Capacitive sensors also enable accurate control of water levels by sending a water-fill signal to the controller. RSWT and RSGD soft starters are also used to soft start and soft stop high pressure pumps in industrial washing equipment.
The food industry requires a high level of hygiene and cleanliness in equipment that has to withstand daily wash-down at high temperatures, high pressure cleaning and harsh detergents. The PD30ET stainless steel sensors work perfectly even in the harshest environments (e.g. in detecting the presence of meat or meat trays on a conveyor system). The sturdy stainless steel housing (AISI316L) together with high-quality plastic materials such as PEEK, PPSU, and PES sealings of FKM, guarantee outstanding mechanical resistance. These sensors are built to withstand cleaning with water at 80°C (176°F), high pressure washing up to 100 bar (1,450 psi) and to resist alkaline and acidic cleaning agents. They are IP69K and Ecolab certified. The PD30 background suppression sensors detect all lid colours on objects at the same distance from the sensor, and their durable design withstands daily cleaning processes. The PA/PH18 sensor series is another solution for applications where harsh cleaning methods are required. The photoelectric sensors - PA18 series - comply with the requirements set out by Ecolab, IP67, IP69K. Offered in a compact M18 threaded ABS housing, this sensor series is available in both axial (straight) and radial (90° right angled) versions. The Carlo Gavazzi ICS series of inductive proximity sensors also the ideal solution for demanding applications characterized by harsh environmental conditions. The Ecolab certification guarantees resistance to industrial cleaning agents, such as alkaline or chlorine foam and acid foam disinfectants. The material used for the plastic cap is FDA certified.

### MAIN FEATURES

- Detecting water-based liquids (up to 50 mS)
- Automatic adaption to tank wall thickness
- Eliminating influence from build-up or foam
- IP65, 66, 67, 68, 69K NEMA type 1,2,4,4X,5,12
- Protection: reverse polarity, shortcircuit and transients

### ICS12 / ICS18 / ICS30

- Operating temperature: -25°C to +80°C (-13° to +176°F)
- Adjustable sensing distance and hysteresis and configurable output
- Up to 2 kHz operating frequency
- IO-Link v1.1

### MAIN FEATURES

- ECOLAB approved
- Short-circuit and overload LED indication
- Extended temperature range: -40°C to +80°C
- FDA approved plastic cap

### MAIN FEATURES

- ECOLAB approved / UL approved
- Extended Temperature range: -40°C to +105°C
- LED version also available

### MAIN FEATURES

- Cylindrical non-toxic polypropylene or stainless steel housing
- Vertical or horizontal mounting
- NO, NC or change-over output function

### MAIN FEATURES

- Multiple flux coding
- Several combinations of safety and auxiliary outputs available
- Operating temperature -25° to +70°C

## Our product range

### 1-phase energy analyzers up to 45A

**EM111**
- 1 DIN module
- Backlit touch LCD
- Measurement of voltage, current, power, power factor, and frequency
- Bi-directional energy metering, 7-digits cl. B (EN50470)
- Measuring inputs: 115/230 VAC, 32 A (max 45 A)

**MAIN FEATURES**
- Self-powered
- Dual tariff management
- Pulse output or RS485 Modbus or M-Bus port
- Sealable terminal covers
- CE - MID (PFA and PFB)

### 1-phase energy analyzers up to 100A

**EM112**
- 2 DIN modules
- Backlit touch LCD
- Display backup by supercapacitor
- Measurement of voltage, current, power, power factor, and frequency
- Bi-directional energy metering, 8-digits, cl. B (EN50470)
- Measuring inputs: 115/230 VAC, 100 A

**MAIN FEATURES**
- Self-powered
- Dual tariff management
- Pulse output or RS485 Modbus or M-Bus port
- Sealable terminal covers
- CE - MID (PFA and PFB)

### 3-phase energy analyzers for direct current up to 65A

**EM340**
- 3 DIN modules
- Backlit touch LCD
- Measurement of voltage, current, power, power factor, and frequency
- Bi-directional energy metering, 3x8-digit, cl. B (EN50470)
- Measuring inputs: 230 to 400 VLL AC, 65 A

**MAIN FEATURES**
- Self-powered
- Dual tariff management
- Pulse output or RS485 Modbus or M-Bus port
- Sealable terminal covers
- CE - MID (PFA and PFB)

## Multifunction meters

**WM14 / WM12**
- Dimensions: 6 DIN-rail module or 96 x 96 mm panel mounting housings
- 3-phase multifunction indicator (WM12) or analyzer (WM14)
- Accuracy 0.5 % (voltage, current)
- Front protection degree IP65, NEMA4X, NEMA12

**MAIN FEATURES**
- Available models from a simple indicator up to an advanced analyzer
- Allows the serial re-transmission of the main parameters to a PLC for full control of the system
- Suitable for DIN-rail or panel mounting

**DPD**
- Dimensions: 22.5 mm DIN-rail mounting enclosure
- 120 VAC to 480 VAC Delta and Star Mains
- Voltage and frequency monitoring
- 2 SPDT 8 A relay outputs
- Approvals/Marks: UL, CSA and CCC

**MAIN FEATURES**
- NFC programming
- Up to 10 configurable setpoints
- Apps for Android and Windows PC programming

**DPA52 / DPB52**
- Dimensions: 81x17.5x67.2 mm DIN-rail housing
- Phase sequence and phase loss (DPA/DPB), Under/Over Voltage (DPR)
- 3-phase AC (own switching power supply)
- Power supply from 208 VLL -40% to 480 VLL +30%
- Approvals/Marks: cULus Listed - CCC approved

**MAIN FEATURES**
- Motor protection from reverse running and phase loss
- 17.5 mm width. Suitable for NORM panels.
- Plug and play: no settings needed (DPA), easy setup (DPR)
## Food and Beverage

### Our product range

<table>
<thead>
<tr>
<th>Monitoring relays</th>
<th>Monitoring relays</th>
<th>3-phase pumps and ventilators soft starters</th>
</tr>
</thead>
</table>
| **DIA53**
  - Dimensions: 81 x 17.5 x 67.2 mm DIN-rail housing with a 12 mm hole for current measurement
  - Current monitoring relay with built-in current transformer
  - 20, 50 or 100 A full scale
  - Self-powered
  - Approvals/Marks: UL - CSA - CCC

### MAIN FEATURES
- 2-wire connection
- Knob adjustable setpoint
- Integrated solid state NPN PNP output

| **DIB71**
  - Dimensions: 81 x 35.5 x 67.2 mm DIN-rail housing
  - Over or under current monitoring relay 1-phase AC/DC TRMS
  - Power supply from 24 to 230 VAC (± 15%)
  - Approvals/Marks: UL - CSA - CE approved

### MAIN FEATURES
- Solution to simply monitor overload LED indication for relay, alarm and power supply ON
- 35.5 mm wide housing suitable both for back and front panel mounting

| **RSWT**
  - Motor rating: up to 45 kW (90 A)
  - 3-phase controlled & internally bypassed
  - Operational voltage: RSWT40: 220 - 400 VAC, RSWT60: 220 - 600 VAC
  - PTC input, Alarm - Top of Ramp - Run relay indication
  - Approvals/Marks: cULus - CCC - EAC

### MAIN FEATURES
- Easy to use and set-up
- Self-learning algorithm to improve pump starts/stops
- Integrated overload protection (Class 10)

### 3-phase general purpose soft starters

| **RSGD**
  - Operational voltage range: 187 - 440 VAC, 187 - 660 VAC
  - Operational current range: 12 AAC up 100 AAC
  - Control voltage: 24 VAC/DC, 110 - 400 VAC
  - Auxiliary relays for top of ramp and alarms
  - Serial communication (Modbus 2-wire) (RSGD 75 mm models)
  - Approvals/Marks: cULus - CCC - EAC

### MAIN FEATURES
- Easy to use and set-up
- Self-learning algorithm to adapt to different loads

| **RSBS / RSBS HP**
  - Current limit starting
  - Advanced diagnostic functions
  - Internally bypassed
  - Up to 12 starts per hour
  - Approvals/Marks: cULus listed

### MAIN FEATURES
- Plug and Play: no external settings needed
- Space saving IP20 design
- Integrated starting capacitor
- Optimised algorithm for high pressure starts (RSBS HP)

| **HAA08 / HAA14**
  - 21.5 x 28 mm housing for 8 pin or 14 pin blade socket
  - Multi-function timer
  - DPDT or 4PDT output
  - Universal power supply
  - Approvals/Marks: cUL - CSA

### MAIN FEATURES
- Front knob adjustable time setting
- Selectable time ranges from 0.1 s to 100 h
- Delay on operate/release, ON/OFF first symmetrical recycle, single/double interval on trigger open/close

CARLO GAVAZZI Automation Components. Specifications are subject to change without notice. Illustrations are for example only.
