

# CG APPLICATIONS

CARLO GAVAZZI

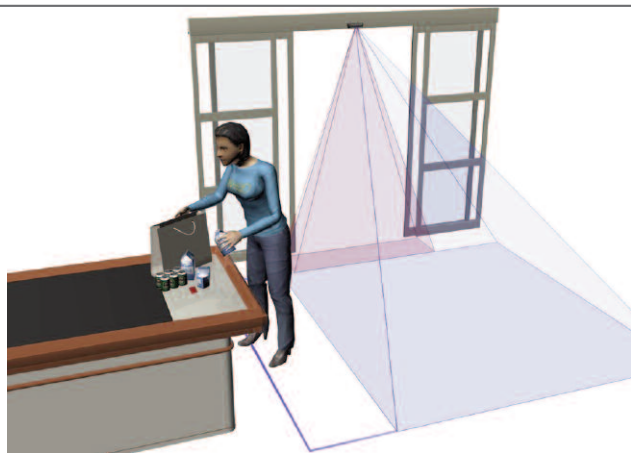

**Application Note:** March 2010

**Market involved :** Doors and Entrance

**Product :** Guardian

**Customer :** Pedestrian Door Customers

**Subject :** Adapting Motion Zone to the Shop Layout

## CUSTOMER ISSUE :

During chagement in shops' layout, it could happen that check out counter has been moved closer to the door.

For this reason there are movement around the check-out counter and the door is always open.

## OUR SOLUTION:

The motion zone can be blanked in 3 directions in 7 steps – so it is very easy to adjust the sensor in order to meet the requested detection area.

## ACHIEVED BENEFITS:

- Movement around the check-out counter is blanked so the door stays closed.
