

CG APPLICATIONS

CARLO GAVAZZI

Application Note: November 2009

Market involved : Food & Beverage

Product : IA12F

Customer : ---

Subject : Position detection in food and beverage applications.

CUSTOMER ISSUE :

In food industry, caustic and acid solutions are used for the machinery cleaning, according to the sanitary and hygienic regulations.

For this reason corrosion free sensors are needed in detecting positions.

OUR SOLUTION:

Provide stainless steel face and barrel inductive sensors, chemically compatible with industrial cleaning solutions.

ACHIEVED BENEFITS:

- Longer sensor lifetime thanks to its robust housing.
- Reduced maintenance.
- Reduced sensor replacement costs.
