

# CG APPLICATIONS

CARLO GAVAZZI

**Application Note:** March 2011

**Market involved :** Material Handling

**Product :** PA18CAP../CRP...

**Customer :** ---

**Subject :** Smart mounting of the sensors

## CUSTOMER ISSUE :

When installing the M18 sensors, they always stick out from the mounting.

It would be better to have a smarter design, so to let the mounting procedure easy and quick.

## OUR SOLUTION:

The PA18CA/CR sensors come with a new mounting bracket, the APA18-MB1, which allows not only a fast mounting but also a nice smooth design.

See the above picture for the axial and radial solutions.

## ACHIEVED BENEFITS:

- Objects do not hit the sensors and the conveyor can be easily cleaned.
